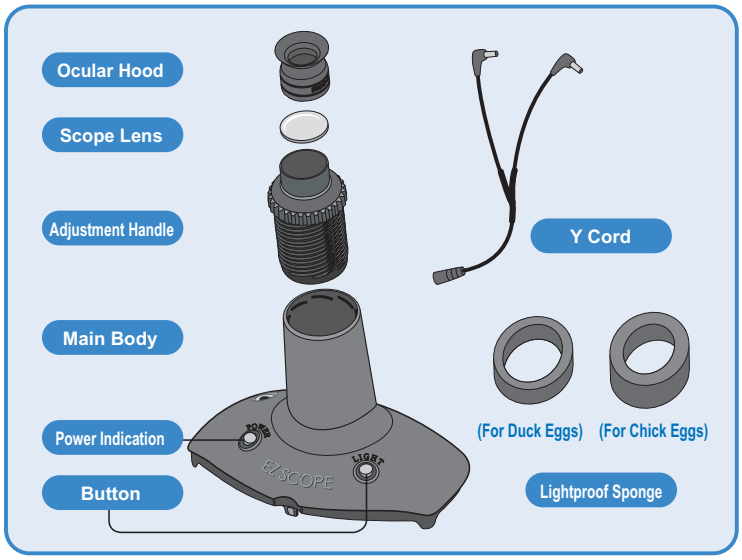
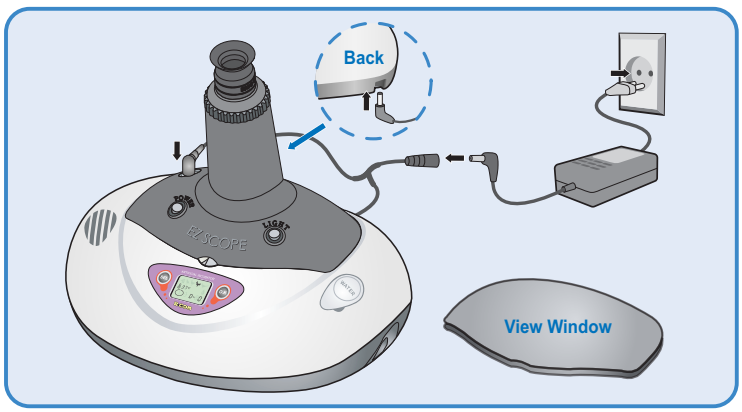
eZ SCOPE User's Manual

Product Composition





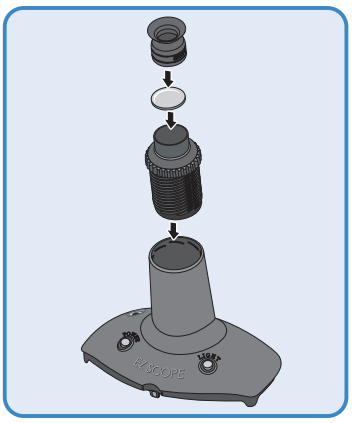
You can inspect the egg by assembling Rcom incubator with EZ Scope. After assemble, press the LIGHT button. You can control the focal point by turning the Adjustment Handle according to your sight.

⚠ Be sure to replace EZ Scope with Rcom view window after egg inspection.

Tip The brighter the egg shell, the easier to inspect the inside. (Ex: Duck egg)

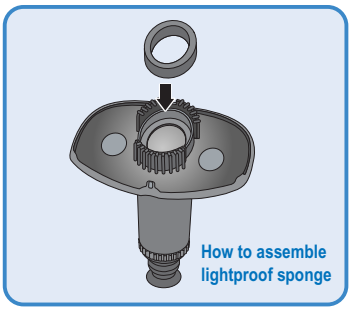
How to use

1 Assemble the Scope as the picture on the right side.

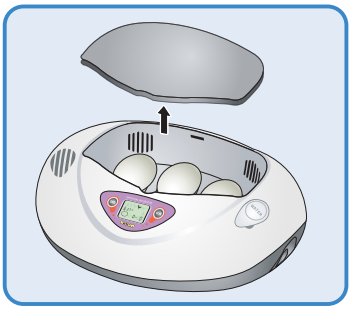


2 Before use, replace proper lightproof sponge to your egg size.

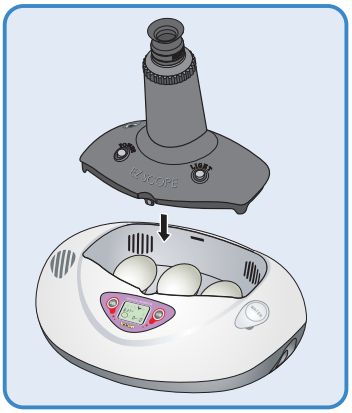
⚠ It is important to select proper lightproof sponge according to your egg size.



3 Open the view window of RCOM incubator.



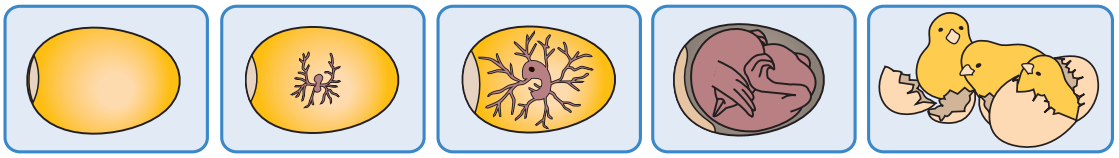
4 Cover the EZ scope on the Rcom main body exactly.



Applied Example

The notebook computer and webcam are not included in the product.

Tip EZ Scope helps you to monitor the incubation progress with your computer by using Webcam.



(An fertilized egg) (5~8th day) (10~13th day) (17~20th day) (Hatching)
